**RE: Supply Chain and Price Outlook, Middle East Uncertainty.**

Dear Customer,

We understand that the ongoing conflict in the Middle East may be causing uncertainty, and we want to reassure you that supporting our customers remains a priority.

While global supply chains are being impacted, we currently expect little to no impact on the supply of products to our customers over at least the next four to six months.

To help ensure continuity of supply, our team is taking the following steps:

- Maintaining strong inventory levels across finished products, components, and raw materials.
- Continuing to invest in increasing inventory where required.
- Working closely with our suppliers and logistics partners to minimise any potential disruption.

Regarding the growing concerns of price fluctuations, for all project-specific orders, our commitment is to maintain price continuity for orders placed in our system and will be delivered at the committed pricing for the duration of your project(s).

In general, for all Clevertronics products including project and stocked products, since we foresee little to no impact over at least the next 4 to 6 months, we do not anticipate price changes over this period.

If anything changes that may affect your project or daily stock orders, we will let you know as soon as possible.

Regards

**Justin Perryman**  
**General Manager Sales – AU / NZ**  
**Clevertronics Pty Ltd**
